

Complex Trauma and Associated Diagnoses

Definition of Complex Trauma

Definition of Complex Trauma

Complex trauma is a condition that results from exposure to multiple, prolonged, and severe traumatic events, often occurring in childhood. It is characterized by a range of symptoms, including but not limited to, hypervigilance, emotional dysregulation, and a sense of helplessness. (Cloitre, 2012, p. 3). <https://doi.org/10.1002/abm.1937>

Complex trauma is a condition that results from exposure to multiple, prolonged, and severe traumatic events, often occurring in childhood. It is characterized by a range of symptoms, including but not limited to, hypervigilance, emotional dysregulation, and a sense of helplessness. (Cloitre, 2012, p. 3).

Complex trauma is a condition that results from exposure to multiple, prolonged, and severe traumatic events, often occurring in childhood. It is characterized by a range of symptoms, including but not limited to, hypervigilance, emotional dysregulation, and a sense of helplessness. (Cloitre, 2012, p. 3).

$\mathcal{H}_t = \mathcal{H}_t(\mathbf{D}_t, \mathbf{F}_t, \mathbf{E}_t)$, 2012), $\mathcal{H}_t = \mathcal{H}_t(\mathbf{D}_t, \mathbf{F}_t, \mathbf{E}_t)$.
